# Eco~SPA™

## ORP CONTROLLED SPA SANITISING SYSTEM

Automatic adjustment of sanitiser level in your spa utilising advanced ORP monitoring and control

### The process

Many years of research and extensive testing have enabled Monarch Industries - market leaders in Salt Water Sanitation Systems - to develop the revolutionary Eco-Spa™ ORP Controlled Spa Sanitising System.

Eco-Spa™ Systems comprise an Intelligent ORP Controlled Power Supply to operate a virtually maintenance free High Quality Self Cleaning Electrode. Eco-Spa™ utilises extremely low levels of common salt at a minimum level of 2500ppm (only 5kg per 2000 litres of water). This mild salt water in conjunction with a small amount of Eco-Spa™ Activator enables the water to be electrolysed using a safe and advanced electronic process to sanitise the water in your spa.

Eco-Spa™ takes the worry out of sanitising your spa by enabling you to choose the level of sanitiser you desire, constantly monitoring and maintaining the level thereafter regardless of how often the spa is used\*. Eco-Spa™ is simple to install on new or existing spas, in ground or portable. Eco-Spa™.... the perfect solution for a safely sanitised Spa.

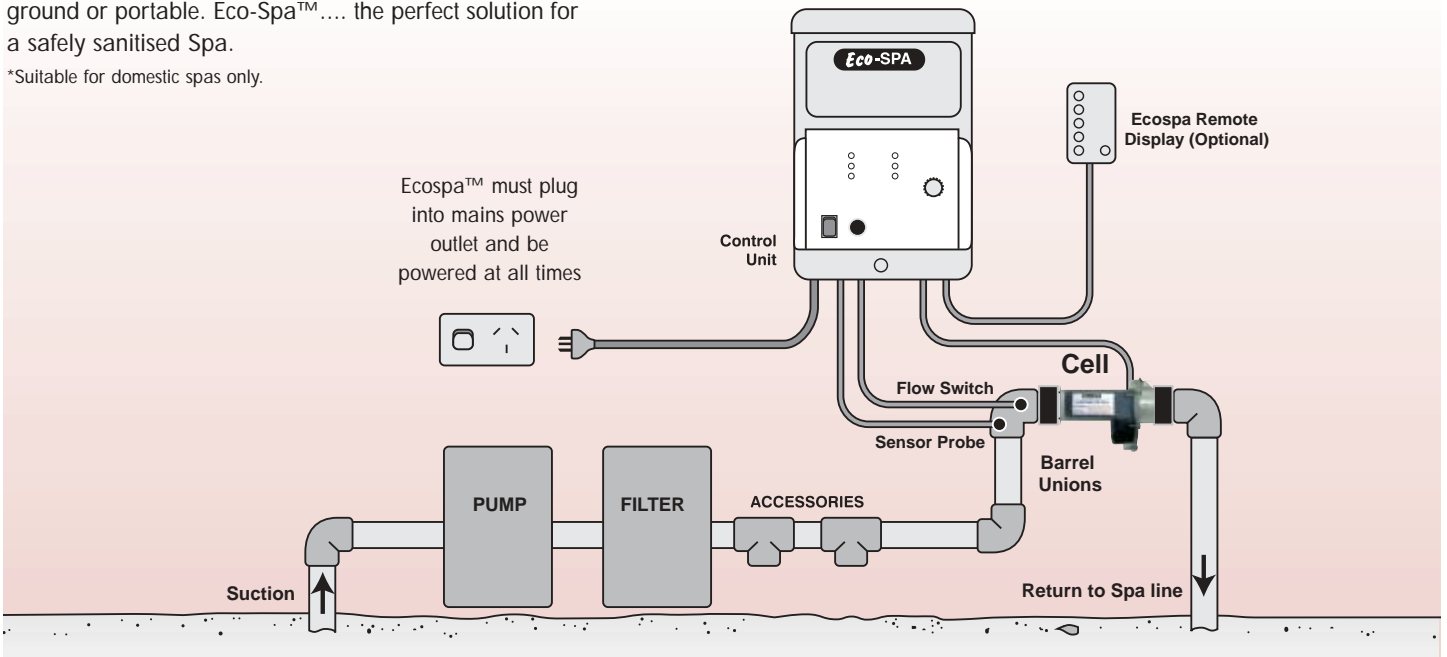

\*Suitable for domestic spas only.

### Eco-Spa™ Advantages

- Suitable for all spa surfaces
- Most efficient and economical spa sanitising system - power consumption only 40 watts when cell is operating!
- No handling or storing of chlorine or bromine
- Environmentally friendly - salt is a natural product
- Fully automatic, safe and simple to use
- Non irritating to skin and eyes
- Mild salt water has therapeutic benefits
- Reliable ORP control of sanitiser level
- Compatible with Ozomatic® and Spazone™ Spa Ozone Systems

### Outstanding features

- Advanced electronic control with LED indicators
- High Flow rate **Self Cleaning** Electrolytic Cell
- Compact ultra modern design
- Quality UV stabilised rust and weatherproof cabinet
- Optional remote display panel with LED indicators for use with portable or inground spas where power supply is not visible from the spa
- Salt level and ORP indicators
- Long life components with virtually maintenance-free operation
- Simple to operate
- Includes Safety Flow Sensor
