SINGLE DRIVE MOTOR

DAVEY
POOLSWEEPA™
Wallclima

Robotic Pool Cleaner

The PoolSweepa Wallclima is a standalone fully robotic pool cleaner that cleans the pool floor, walls and water line.

APPLICATIONS

Ideal for swimming pools such as:

- Lap pools (Optima only)
- Concrete and tiled pools
- Fibreglass pools
- Vinyl liner pools

WHY CHOOSE THE PoolSweepa™ Wallclima or Optima?

Wallclima and Optima require no connection to pool filtration systems and its environmentally-friendly cleaning process means you require less chemicals. It scrubs, brushes, vacuums and filters to prevent germination of algae and bacteria.

Optional Wonder Brush available for fully tiled or fibreglass pools.

DUAL DRIVE MOTOR

DAVEY
POOLSWEEPA™
Optima

Robotic Pool Cleaner

The PoolSweepa Optima is a top of the range standalone fully robotic pool cleaner with exceptional cleaning capabilities. Optima is suited for larger residential pools up to 15 metres in length.

- Suitable for pools up to 12m in length and beach entry pools with Wallclima and 15m with Optima
- Cleans pool floor, walls and water line
- Digital switch mode power supply for long term drive control and lower running costs
- Adjustable handle floats for optimal pool coverage
- Ultra fine filter bag collects dirt, debris and dust particles
- Advanced scanning programme optimises pool coverage
- Obstacle escape capability
- Automatic shut off at end of cycle time
- Motor protection mechanism in case of the pool cleaner being overloaded or out of water
- 3 year warranty on all parts

SPECIFICATIONS	WALLCLIMA	OPTIMA
Model number	APCCLIMA	APCOPTIMA
Maximum pool length	12m	15m
Wall climbing	Yes	Yes
Remote control	No	Yes
Cleaning time	3 hrs	2-4 hrs
Cable/hose length	18m	18m
Swivel cable to avoid tangles	Yes	Yes
Suction rate	17m ³ per hr 283 lpm	18m ³ per hr 300 lpm
Long wearing PVC brushes (Standard)*	Yes	Yes
Motors	One	Two
Motor unit voltage DC	24V DC	24V DC
Filtration fine porosity	Yes	Yes
Caddy	Yes	Yes
Weight	10kg	11kg
Warranty on all parts	3 years	3 years

* Optional: Wonder brushes available for fully tiled or fibreglass pools.
(Model No. : APCWBCLIMA - WALLCLIMA, APCWBOPTIMA - OPTIMA)

WALLCLIMA & OPTIMA VS COMPETITOR

The diagrams below are based on computer scan technology which recorded pool coverage by PoolSweepa WALLCLIMA and a leading competitor's cleaning unit over the same pool surface area after a two hour cycle.

WALLCLIMA's advanced scanning programme maps the pool surface contours and obstacles, and efficiently cleans the floor, walls and water line over a series of passes. The competitor model at right has tracked less passes over the pool surface, which results in missed surface grime.
