

# TS Series

Twin Undersink Water Filter System

Dual filtration for extended filter life with LED reminder

## Safe Drinking Water

Safe and healthy water for the whole family. This system does not remove essential minerals or fluoride.

## Pure Water on Tap

Turns your ordinary tap water into delicious great tasting water for cooking and drinking

# TS Series

Dual filter system that turns your tap water into healthy delicious drinking water – the way it was meant to be.

## EASY HOME INSTALLATION

The PureMix installs under your existing kitchen bench and uses your current tap, so it fits right into your current lifestyle. And the unit can be installed vertically or horizontally, so it won't clutter up your home.

## DUAL STAGE FILTRATION

TS Series system incorporates the most advanced **Dual Action Filtration Technology**. With 2 levels of filtration, the TS Series filters your water of sediment, rust and dirt. Taste, odour, chlorine and other chemicals are absorbed by the carbon block technology leaving healthy, great tasting water as possible.

## LONGER FILTER LIFE

The TS Series incorporates Puretec's long life filter technology, so you can go longer between filter replacements, and comes with our **3 Year Platinum Protection Warranty**.

Important Note: Use only genuine Puretec replacement cartridge

Puretec water care products are designed, manufactured and supported by Puretec Pty Ltd the name you can trust for viable and proven water solutions. The complete range of Puretec products are developed, refined, made to meet and exceed stringent specifications for the worldwide market.

**Important Note:** Sales of products are subject to our Terms and Conditions which are available upon request. All specifications, information and photos are a guide only and are subject to change without notice. Please ring to confirm details. **Warning:** For correct operation of this appliance it is essential to observe manufacturer's instructions. **Caution:** Do not use with microbiologically unsafe water or water of unknown quality without adequate disinfection before or after the system. Under normal circumstances a pressure limiting valve is not required. If incoming water pressure is excessive it may however be necessary to install an approved pressure limiting valve. Maximum flow depends on cartridges, vessel, pressure, impurities etc.
